EXPERIENCE

Python Developer Intern - *Kalawati Technologies (Remote)*

- Developed key features for a client-facing web application using the Python Django framework, contributing to a more robust and user-friendly product.
- Engineered and integrated back-end logic with front-end designs for three new application modules, improving overall functionality.
- Collaborated in an Agile team to implement best practices in version control (Git) and code reviews, resulting in a 15% reduction in post-deployment bugs.

PROJECTS

Personal Finance Management System | *Python (Flask), MySQL*

- Engineered and deployed a secure, full-stack financial management web app using Python (Flask) and MySQL.
- Created dynamic data visualizations with Seaborn and Matplotlib to provide users with actionable insights into their finances.

AI-Powered FAQ Bot | *LangChain, OpenAI API, Streamlit, FastAPI, React*

- Built a GPT-powered chatbot using a LangChain RAG pipeline for intelligent, context-aware responses.
- Developed a scalable backend with FastAPI and deployed a responsive UI with Streamlit and React.

CERTIFICATIONS

- **Data Science & Generative AI/ML** - Naresh IT Hyderabad
